FMP Action Plan and Timetable			
Week	Date Week Beginning	Activity / What you are intending to do - including independent study	Resources / What you will need to do it - including access to workshops
1	20/03/2017	For independent study, I will watch a range of films falling under both the Adventure genre and the Fantasy genre to widen my knowledge of the codes and conventions involved in such media products. This will be done at home.	I will, of course, need access to the films. These, however, may be films I already own and so it is simply a matter of having spare time to watch them and take note of what I will need to adapt into my own project.
2	27/03/2017	I will pitch the idea with a presentation to support my statements. I will then create a document which lists each role of the person within the group. (Actor/Cinematographer/etc.) This will be handed out to each of them or emailed. (Raise awareness)	I will need access to a computer. (Normal, weekly classrooms) This work is all computer-based.
2	27/03/2017	I will begin to create a timeline with events which will take place in the short film. I will also create a storyboard and shooting script. I will list the equipment I will need and the dates I will need it for.	I will only need access to the any rooms with computers.
3	03/04/2017	I will create a checklist to keep track of what equipment and facilities have been booked and when they will be available.	I will simply need access to a computer. (Normal, weekly classrooms)
4	01/05/2017	I will travel to the Peak District and shoot the film.	I will need access to a Canon 550D as well as a Morantz kit, a boom pole, a shotgun microphone and a large tri-pod. All of these are requirements for when actually shooting the project.
4	01/05/2017	I will begin editing the final major project.	I will need access to the college computers (Preferably PCs) to use the Adobe software for editing.
5	24/05/2017	I will complete the final major project. (Fully edited/Colour-graded/Audio synced up and additional Foley added)	Again, I will need access to the college computers (Preferably PCs) to use the Adobe software for editing.
5	24/05/2017	I will begin gathering feedback for the finished product from other members outside of the group.	I will need access to the college PCs to record all feedback in a word document.

6	05/06/2017	I will begin my evaluation based on the feedback I have received along with my knowledge gathered from the experience of working on the project. I will also add to my reflective journal with regards to how successful the process of working towards the completion of the product was. The final major project will be completed	<p>I will need access to the college computers (PCs/Macs) to write my evaluation and add to my reflective journal.</p> <p>I will also need access to the college PCs to ensure all editing is completed and the final project is exported.</p>
